

Our association was created by its actual president, M. Pitou Ang.

Half French Half Cambodian, he was one of the victims of the Khmers rouges regime. In 1994, he came back in the country where he was born to Codeaukhmer.

The purpose of the association is to improve the way of life in the countryside and stop the rural exodus. Our projects are divided in four action types: drinking water network and sewage system development, education, economic development help, deforestation fighting.

Codeaukhmer benefit from the expertise of young Cambodians trained to ISO 9001 quality approach and support by a French team composed by EDF-GDF suez agents.

After 20 years of close collaboration with the local population, we already take action in 13 provinces.
