

# Cloud Servers Nashville

---

In 1996, Smartvue founder and CEO Martin Renkis built a prototype web-based surveillance system with a vision of making complex network video technologies elegantly simple. This led to the launch of the world's first plug-and-play cloud surveillance system in 1999 and remains the inspiration for Smartvue's visual intelligence platform.

Today Smartvue is an enterprise cloud services company protecting millions of people, places and assets worldwide. It delivers end to end visual intelligence solutions and is contracted to provide cloud surveillance to some of the world's largest cable companies, telcos, storage providers, camera manufacturers, and access control companies. Smartvue is passionate about innovation and leads the industry with more than 25 patents and dozens of awards for its pioneering technologies and services.

## S12M Server

Smartvue S12M is an entry-level HD video surveillance recorder and cloud server platform, perfect for installations with up to 6 cameras. Available with up to 64GB SSD storage.

## S12E Server

Smartvue S12E is the most cost-effective HD video surveillance recorder and cloud server platform, perfect for installations with up to 24 cameras. Available with up to 8TB storage.

## S12F Server

Smartvue S12F is a mid-range HD video surveillance recorder and cloud server platform, perfect for installations with up to 32 cameras. Available with up to 30TB storage.

Smartvue S12G is a small-enterprise HD video surveillance recorder and cloud server platform, perfect for installations with up to 100 cameras. Available with up to 48TB storage.

## **S12R Server**

Smartvue S12R is an enterprise HD video surveillance recorder and cloud server platform, perfect for installations with up to 100 cameras. Available with up to 1.5PB storage.

## **Video Surveillance Made Elegantly Simple**

Smartvue's Cloud Video Surveillance Platform enables distributors to unlock all the tools of a modern enterprise video surveillance platform without spending large sums of money, investing in extensive training and hiring dedicated staff. Smartvue surveillance solutions are simple and intuitive. Since our solutions are cloud-based, there's no special software needed to download or update. You're no longer tied to a single workstation or control room. An unlimited amount of users can remotely login from any computer, tablet or smartphone to view and manage all your cameras and servers from one screen.

## **Video Surveillance Made Elegantly Simple**

Protecting large facilities and assets is a challenge that Smartvue takes on. Our system makes it easy to add cameras or move from location to location. Keep your employees and assets safe with the surveillance that only Smartvue can provide. Monitor, manage, store, and share HD video surveillance with the power of the cloud and see what you have been missing.
