

economics and psychology

MASTER 2

RESEARCH

presentation

The Master 2 **Economics and Psychology** is open to students from all countries in search of a deeper understanding of economic behavior and the open-mindedness brought by a truly bi-disciplinary training in economics and psychology.

A majority of courses will be taught in English.

The Master 2 makes an intensive use of research in the training of students.

The courses focus on the interface between economics and psychology through:

- Advanced courses in psychology (cognitive, social, differential, neurosciences) and economics (behavioral, experimental, neuroeconomics, econometrics) with equal contributions of both disciplines;
- Participation in the annual research seminar « Economics and Psychology »;
- Bi-disciplinary research project;
- Optional internship in the second semester;
- Possibility for graduates to prepare a PhD in economics or psychology;

facts and figures

TARGET AUDIENCE:
students with a M1 in Economics and Psychology. Candidates with 4 years of higher education (Universities or “Grandes écoles”) and an adequate bi-disciplinary training in economics and psychology

CLASS SIZE: 30 students

ACADEMIC YEAR: Sept-June

LANGUAGE: English

upon completion

Graduates will have a deep understanding of human behavior in business and social environments. They will be able to adjust to many different jobs, be internationally mobile, evolve in their careers, and have eventually access to higher executive functions. Brilliant and motivated students will be at the cutting edge of research in economics and psychology. Graduates will be highly appreciated in some consulting activities in public or private organizations, human resource management, customer services, marketing, advertising, public relations, social policy, or strategic development...

*An international
 bi-disciplinary
 program
 for understanding
 economic behavior*

« Economics and Psychology » Seminar	–	3
Research dissertation	–	15

admission criteria

Successful accomplishment of a M1 in Economics and Psychology provides access directly to M2. Candidates with four years of higher education and an adequate bi-disciplinary training in economics and psychology can be considered for direct admission in M2. Admission decisions are based on transcripts of the previous 4 years of study, CV, a letter of motivation, and letters of recommendation. A sufficient knowledge of English is required. This Master is designed for students with a four-year degree in Economics, Psychology, Applied Maths, and « Grandes écoles ».

terms of admission

We recruit a limited number of very good and motivated students coming from all parts of the world. French students are expected to have sufficient knowledge of English and foreign students are expected to know some French and be fluent in French after their studies. We also attach value to open-mindedness, general knowledge, and social skills. Candidates with prior training in economics enroll in Paris 1 and obtain a Master in Economics whereas candidates with prior training in psychology enroll in Paris Descartes and obtain a Master in Psychology.
