- <http://eternagame.org/> - EteRNA is a browser-based "game with a purpose" that engages users to solve puzzles related to the folding of RNA molecules.
- <http://fold.it/portal/> - Foldit is an online puzzle video game about protein folding.
- <http://hvdfonts.com/> - HVD Fonts is a type foundry from Berlin/Germany, founded by Hannes von Döhren. They produce high quality typefaces as much for display as for text use.
- <http://linkeddata.org/> - Linked Data is about using the Web to connect related data that wasn't previously linked, or using the Web to lower the barriers to linking data currently linked.
- <http://futurescope.com/eng/index.php> - Parc d'attractions et de spectacles.
- <http://makeascii.com/> - Take any image and create a really cool ASCII version, where letters replace the pixels, of the image. Give it a try.
- <http://photosynth.net/> - Capture places, share them with your friends, publish them to Bing.
- <http://planetarycollective.com/> - We are a creative organization dedicated to worldwide interruption. We believe passionately in the power of creative works to change perspectives, lives, and ultimately the planet.
- <http://plethora-project.com/> - Plethora-Project.com is an initiative to accelerate computational literacy in the frame of architecture and design.
- <http://resizemybrowser.com/> - A simple, useful and beautiful browser window resize app for Web designers and developers.
- <http://ryuuui.com/great-masters.html/> - Calligraphy, research and learning, photography, body art, boudoir, and commercial photo services.
- <http://thewhalehunt.org/> - An experiment in human storytelling, using a photographic heartbeat of 3214 images to document an Eskimo whale hunt in Barrow, Alaska.
- <http://typing.io/> - Typing.io is a typing tutor for programmers. Practice typing the hard-to-reach symbols in code.
- <http://validator.w3.org/> - W3C's easy-to-use markup validation service, based on SGML and XML parsers.
- <http://wearbuild.com/> - Build is an award-winning creative agency. We work with creative, design-led clients, to produce work they are justifiably proud of.
- <http://wefeelfine.org/> - An exploration of human emotion, in six movements by Jonathan Harris and Sep Kamvar.
- <http://www.www.jodi.org/> - jodi.org is a collective of two internet artists: Joan Heemsckerk and Dirk Paesmans.
- <http://github.com/christiannaths/Redacted-Font> - Keep your wireframes free of distracting Lorem Ipsum.
- <http://google.com/culturalinstitute/project/art-project> - Google Art Project

Notepad++	-	Code editor which supports several programming languages running under the MS Windows environment.
Coda	-	Panic Software offers a sleek, trimmed-down alternative to expensive Web design suites. (Mac Only)
TextMate	-	General-purpose GUI text editor for Mac OS X.
Sublime Text	-	Sophisticated text editor for code, markup and prose.
Vim	-	Designed for use both from a command-line interface and as a standalone application in a graphical user interface.
Codelgniter	-	Rapid development web application framework, for use in building dynamic web sites with PHP.
Laravel	-	PHP web application framework intended for the development of web applications following the model-view-controller (MVC).
Symfony	-	Symfony is a PHP web application framework for MVC applications.
Slim	-	PHP micro framework that helps you quickly write simple yet powerful web applications and APIs.
Phalcon	-	High-performance web application framework for PHP based on the model-view-controller (MVC) pattern.
CakePHP	-	Web application framework. It follows the Model-View-Controller (MVC) approach and is written in PHP.
Zend	-	Zend Framework (ZF) is an open source, object-oriented web application framework implemented in PHP 5.
Clojure	-	Clojure is a general-purpose programming language with an emphasis on functional programming.
Light Table	-	(IDE) for software engineering. Features real-time feedback allowing instant execution, debugging and access to documentation.
Qt	-	Cross-platform application framework that is widely used for developing applications.
Aurelia	-	Next gen JavaScript client framework for mobile, desktop and web that leverages simple conventions to empower your creativity.
Adobe Brackets	-	Free open-source editor written in HTML, CSS, and JavaScript with a primary focus on Web Development.
Elixir	-	Dynamic, functional language designed for building scalable and maintainable applications.
Code::Blocks	-	C, C++ and Fortran IDE built to meet the most demanding needs of its users.
Android Studio	-	Android Studio is the official IDE for Android application developing on the Android platform.
Bloodshed Dev-C++	-	Full-featured Integrated Development Environment (IDE) for the C/C++ programming language.
ASP.NET	-	Open-source server-side Web application framework designed for Web development to produce dynamic Web pages.
Visual Studio	-	Collection of developer tools and services to help you create apps for the Microsoft platform and beyond.
.NET Framework	-	Microsoft Software framework intended to be used by most new applications created for the Windows platform.
Microsoft Visual Studio	-	(IDE) It is used to develop computer programs for Microsoft Windows, as well as web sites, web applications and web services.
Visual Studio Code	-	Source code editor. It includes support for debugging, embedded Git Control, rich development experiences, and other features.
JavaFX	-	Software platform for creating desktop applications, and rich internet applications (RIAs).
Java SE	-	Java Platform that lets you develop and deploy Java applications on desktops and servers.
Apache Flex	-	Software development kit (SDK) for development and deployment of cross-platform rich Internet applications.
Joomla	-	Content management system (CMS) for publishing web content. Estimated to be the second most used CMS on the Internet.
Ruby on Rails	-	Rails is a model-view-controller (MVC) framework, providing default structures for a database, a web service, and web pages.
Ruby Version Manager	-	Command-line tool which allows easily install, manage and work with multiple ruby environments from interpreters to sets of gems.
Web Developer	-	Extension for Mozilla-based web browsers that adds editing and debugging tools for web developers.
Firebug	-	Extension for Firefox that facilitates the live debugging, editing, and monitoring of any website's CSS, HTML, DOM, XHR, and JS.
HTML Tidy	-	Tool for checking and cleaning up HTML source files. It is useful for finding and correcting errors in deeply nested HTML.
CodeKit	-	CodeKit helps you build websites faster and better. (Mac Only)
WordPress	-	A semantic personal publishing platform with a focus on aesthetics, web standards, and usability.
LibreJS	-	Add-on for GNU IceCat and Mozilla-based browsers. It blocks nonfree nontrivial JavaScript.
libgdx	-	Desktop/Android/HTML5/iOS Java game development framework.
Ngrok	-	Secure introspectable tunnels to localhost webhook development tool and debugging tool.
IntelliJ IDEA	-	Java integrated development environment (IDE) for developing computer software.
Kivy	-	Python framework for development of applications that make use of innovative user interfaces, such as multi-touch apps.
Pycharm	-	PyCharm is an Integrated Development Environment (IDE) used for programming in Python.
MATLAB	-	High-level technical computing language. Develop and share applications as code, executables, or software components.
PowerShell	-	Windows PowerShell is a task automation and configuration management framework built on the .NET Framework.
GTK+	-	(Previously GIMP Toolkit) is a cross-platform widget toolkit for creating graphical user interfaces.
UIKit	-	A lightweight and modular front-end framework for developing fast and powerful web interfaces.
Bitwise SSH	-	Provides you with the capability of connecting to SFTP servers using your regular FTP client.
CyberDuck	-	Offers secure transfers, multiple connections, drag-and-drop, queue-based transfers, rendezvous and AppleScript
WampServer	-	WampServer is a Windows web development environment.
Double Commander	-	Double Commander is an open source orthodox file manager that is inspired by Total Commander.
tmux	-	Software application that can be used to multiplex several virtual consoles.
AtoM	-	Web-based application for standards-based archival description and access in a multilingual, multi-repository environment.
MATLAB	-	(matrix laboratory) is a multi-paradigm numerical computing environment and fourth-generation programming language.
HxD	-	Hex editor which, additionally to raw disk editing and modifying of main memory (RAM), handles files of any size.
Chicken Scheme	-	CHICKEN is a compiler for the Scheme programming language.
Bash	-	Is a Unix shell and command language for the GNU Project.
MiKTeX	-	MiKTeX is a distribution of the typesetting system LaTeX for Microsoft Windows
XNA/MonoGame	-	One framework for creating powerful cross-platform games.
SFML	-	SFML Provides a simple interface to the various components of your PC, to ease the development of games and multimedia apps.
Love2d	-	Lightweight gamedev platform developed by a vibrant community, enabling everyone to create 2D games.
Processing	-	(IDE) Software sketchbook and a language for learning how to code within the context of the visual arts.
Toxiclibs	-	Independent, open source library collection for computational design tasks with Java & Processing
Plethora-Project	-	Is an initiative to accelerate computational literacy in the frame of architecture and design.
Peasycam	-	Library for the programming environment processing.
ControlP5	-	ControlP5 is a GUI and controller library for Processing.
Hemesh	-	3D mesh library for Processing.
Minim	-	Audio library that uses the JavaSound API, Tritonus, and Javazoom's MP3SPI for people developing in the Processing environment.
vvv	-	v4 is a general purpose toolkit with a special focus on real-time motion graphics, audio and video synthesis.
vvv.js	-	Toolkit for prototyping and developing rich data visualisation, advanced user interfaces, games, and more.
Inkscape	-	Professional quality vector graphics software which runs on Windows, Mac OS X and Linux.
Paint.NET	-	Full-featured image and photo editing software for computers that run Windows.
GIMP	-	GNU Image Manipulation Software.
Krita	-	Raster graphics editor based on the KDE Platform. Krita is designed to be a digital painting application.
Corel Painter	-	Raster-based digital art application created to simulate the appearance and behavior of traditional Media.
DoubleCAD XT	-	AutoCAD LT work-alike. But free. With so many new, innovative features.
FreeCAD	-	FreeCAD is a free and open-source general-purpose parametric 3D CAD modeler.
Toon Boom Studio	-	Easy-to-use animation software. Toon Boom Studio is the best 2D animation software available.
Pixologic Zbrush	-	Digital sculpting tool that combines 3D/2.5D modeling, texturing and painting.

Cinema 4D	-	3D modeling, animation and rendering application developed by MAXON Computer.
Blender	-	3D computer graphics software used for creating animated films, art, models, interactive 3D applications and video games.
SketchUp	-	(Formerly Google Sketchup) 3D modeling computer program for a wide range of drawing applications.
Autodesk AutoCAD	-	Architecture, engineering, and construction software to create precise 2D and 3D drawings.
Autodesk 3ds Max	-	3D computer graphics program for making 3D animations, models, games and images.
Autodesk Softimage	-	Softimage is a 3D computer graphics application, for producing 3D computer graphics, 3D modeling, and computer animation.
Autodesk Maya	-	3D computer graphics software for making interactive 3D applications, including video games, animated films, or visual effects.
Autodesk Sketchbook Pro	-	Drawing and painting software with professional-grade perspective tools and an intuitive user interface.
Autodesk Mudbox	-	Mudbox is a proprietary computer-based 3D sculpting and painting tool. Currently developed by Autodesk,
NUKE	-	Node-based digital compositing application used for film and television post-production.
RealFlow	-	Fluid and dynamics simulation tool for the 3D and visual effects industry.
Mari 3D	-	The Foundry's cutting-edge 3D paint tool, MARI gives you a fluid & flexible way to paint directly onto 3D models.
Unity 3D	-	Unity is the ultimate game development platform. Unity is a cross-platform game engine.
Pixar RenderMan Studio	-	Proprietary photorealistic 3D rendering add-ons to Autodesk Maya based on their own RenderMan Interface Specification.
Rhinoceros	-	Rhino3D is a commercial 3D computer graphics and computer-aided design (CAD) application software.
Grasshopper	-	Graphical algorithm editor tightly integrated with Rhino's 3-D modeling tools.
Wings 3D	-	3D computer graphics open-source subdivision modeler inspired by Nendo and Mirai from Izware.
Endorphin	-	Dynamic motion synthesis software package developed by NaturalMotion.
V-Ray	-	Rendering plug-in for 3D computer graphics software applications.
OctaneRender	-	OctaneRender is the world's first and fastest GPU-accelerated, unbiased, physically correct renderer.
xNormal	-	Bakes down high-res sculpts/geometry meshes to low-res and game-ready mesh, maintaining the detail from high sculpt/geometry.
TurbulenceFD	-	Voxel-Based Gaseous Fluid Dynamics.
Krakatoa MX	-	Volumetric Particle Rendering, Manipulation and Management Toolkit Plug-in for Autodesk 3ds Max.
FumeFX	-	Fluid dynamics engine designed for simulation and rendering of realistic fire, smoke, explosion and other gaseous phenomena.
Houdini	-	3D animation application software developed by Side Effects.
Vicon Boujou	-	Software and systems for motion capture in the animation market, biomechanics and ergonomics.
Guitar Pro	-	Tablature editor software for music instruments.
LMMS	-	Free digital audio workstation. Music can be produced by synthesizing sounds, arranging samples and MIDI keyboard.
Arduour	-	Hard disk recorder and digital audio workstation application suitable for professional use. (Linux, OS X and FreeBSD).
Max/MSP	-	Visual programming language and Digital signal processing environment.
Pure Data	-	Visual programming language. real-time graphical programming environment for audio, video, and graphical processing.
GEM	-	GEM (Graphics Environment for Multimedia) is a tool for visuals. Generate and manipulate 2D and 3D graphics and animations.
Fractstein	-	Software for processing images and video to Pure Data.
Gridflow	-	A multidimensional dataflow processing library for PureData, designed for interactive multimedia.
SuperCollider	-	SuperCollider is an environment and programming language for real-time audio synthesis and algorithmic composition.
Csound	-	Computer programming language for sound, also known as a sound compiler or an audio programming language, or an audio DSL.
Iannix	-	Iannix is a graphical open-source sequencer for digital art.
MusE	-	MIDI/Audio sequencer with recording and editing capabilities. MusE aims to be a complete multitrack virtual studio for Linux.
MuseScore	-	Sheet music notation software.
Audacious	-	Audio player with support for many formats, and it has support for third-party plugins.
Psyche	-	Modular music production software to make music on Windows. Based on the tracker interface (the vertical timeline sequencer).
OpenMusic	-	(OM) is an object-oriented visual programming environment for musical composition based on Common Lisp.
MetaSynth	-	Sound design, synthesis, and electronic music software for Mac OS.
Hyperupic	-	Image to sound transducer. Hyperupic will transform most tiff images into soaring melodies.
Stochos	-	Real-time stochastic event generator system for computer music and sound design.
GranuLab	-	Real-time granular synthesizer for Windows. GranuLab is a realtime generator of sound grains for Windows 95.
GoMinimal! v2.5	-	Transform plain ascii text-files (*.txt) and (RIFF 8 or 16 bit) wave-files (*.wav) into Standard Midi Files (*.mid).
AudioMulch	-	Modular audio software for making music and processing sound.
EmissionControl	-	Interactive real-time Prototype granulation software. for granular synthesis and sound file granulation. (MacOS/PowerMac G5 Only)
PulsarGenerator	-	The program generates sound particles called pulsars.
CloudGenerator	-	Synthesizes granular sounds in units called "clouds" and also "granulates" stereo sound files. (MacOS 9 only)
music21	-	Framework for Computer-Aided Musical Analysis and Manipulation. A flexible toolkit for computer-aided musicology.
athenaCL	-	Modular poly-paradigm algorithmic music composition in a cross-platform interactive command-line environment.
Scriptographer	-	Scripting plugin for Illustrator. It gives the user the possibility to extend AI's functionality by the use of the JS language.
Font Awesome	-	Full suite of pictographic icons for easy scalable vector graphics on websites. Get started at http://fontawesome.io
Wine	-	Compatibility layer software that aims to allow applications designed for Windows to run on Unix-like operating systems.
Tor	-	Free software for enabling anonymous communication. Tor directs Internet traffic through a free, worldwide, volunteer network.
Apache OpenOffice	-	(AOO) Open-source office productivity software suite. Integrates features and improvements from IBM Lotus Symphony.
LibreOffice	-	LibreOffice is a free and open source office suite, developed by The Document Foundation.
Calligra Suite	-	Graphic art and office suite. It is available for desktop PCs, tablet computers, and smartphones.
EveryonePiano	-	Free computer keyboard piano software, which supports downloading 3 types of music score formats.
Stamina	-	Multifunctional touch typing tutor with support for several layouts.
KeyBlaze	-	Learn to Touch Type, Complete with Typing Games.
Mecamatic	-	Maximize your typing speed on your PC.
Chaotica	-	Advanced fractal-software, which was designed to create and render flame-fractals in the best quality possible.
Magic Bullet Suite	-	Plug-in for After Effects made to make digital video look more like film.
ExtraFile	-	Conceptual software in storing image data. The process and the resulting bytes, regardless of content, become the artwork itself.
Monglot	-	Monglot aims to show the ambivalence and the double articulation of File Format-based Glitch Art.
Nato.0+55+3d	-	Application software for realtime video and graphics used to manipulate video for live performances.
Presto	-	SQL query engine for running interactive analytic queries against data sources of all sizes.
FLxER	-	FLxER is an interactive, flash-based free-software for audio/video/multimedia contents mixing and live video performances.
TouchDesigner	-	Visual development platform with the tools you need to create stunning realtime projects and rich user experiences.
FFGL	-	FreeFrameGL is an open-source, cross-platform plugin system for video effects.
VSXu	-	An Audio Visualizer, Music Visualization, Visual Programming Language (VPL), Realtime Graphics Design Platform.
FreeFrameSDK	-	FreeFrame is an open-source cross-platform real-time video effects plugin system.
Glyphs	-	Built-in multi-layer preview and specialized editing Font tool.
RoboFont	-	RoboFont is a UFO based, Mac only, font editor.
PureRef	-	PureRef is a program that enables you to view and organize your reference images.
LiveSplit	-	Sleek, highly-customizable Auto Splitting timer for speedrunners.
CintaNotes	-	Microsoft Windows application for taking and managing notes.
Everything	-	Quick file indexing and search engine to locate files and folders by name.
KakaoTalk	-	Multi-platform texting app that allows iPhone, Android, and BlackBerry users to send and receive messages for free.
WebZap	-	Photoshop Plugin with tools and functionalities designed to assist web developers with their mockup and ui design workflow.
Scribus	-	Professional layout and publishing software supporting EPS and SVG, and PDF support.
Metasploit	-	Find security issues, verify vulnerability mitigations & manage security assessments with Metasploit
XNView	-	For Desktops. Applications for Desktops, XnView is an image organizer and general-purpose file manager
Pluma	-	Graphical application which supports editing multiple text files in one window (tabs or MDI).
Speccy	-	See a quick summary or dive deeper on what's inside your PC.
Kodi Helix	-	Kodi is an free and open source software media center for playing videos, music, pictures, games and more.
Banshee	-	Play your music and videos. Keep up with your podcasts and Internet radio. Discover new music and podcasts.
Pale Moon	-	Firefox-based web browser available for Microsoft Windows and Linux, focusing on efficiency and ease of use.
Chromium	-	Chromium is the open-source web browser project from which Google Chrome draws its source code.
Quickpic	-	QuickPic offers password-protected access to high-resolution images, videos and documents in a comprehensive databank.
Iceweasel	-	Backporting of security fixes to declared Debian stable version.
MusicBee	-	Geared toward managing extensive music collections, easy to use and with a comprehensive feature set.
Pithos	-	Pithos is a native Pandora Radio client for Linux.
Geany	-	Text editor using the GTK2 toolkit. Fix spawning programs on Windows. Powerful yet lightweight IDE.
Pidgin	-	Free and open-source multi-platform instant messaging client.
Guake Terminal	-	Guake is a top-down terminal for Gnome.
Anki	-	Makes remembering things easy with powerful, intelligent flashcards. A lot more efficient than traditional study methods.
Avidemux	-	Free and open-source video editing program designed for video editing and video processing.
Yakuake	-	(Yet Another Kuake) is a KDE terminal emulator. It supports skinning, split viewing, and profiles, as Konsole does.
Radium	-	Radium is a proprietary Internet radio player application, used for listening to internet radio streams.
Live Labs Pivot	-	Pivot is a software application from Microsoft Live Labs that allows users to interact with and search large amounts of data.
Seadragon Software	-	Seadragon technology allows one to view high resolution images without the loading time typically associated with large images.
GuideGuide	-	Extension for Adobe Photoshop that makes it easy to place guides and create grids in your document or selection.
CSS Hat	-	Photoshop plugin which instantly turns layer styles to CSS3! Speed-up your Photoshop workflow.
Macaw	-	Macaw provides the same flexibility as your favorite image editor but also writes semantic HTML and remarkably succinct CSS.
CFEngine	-	Configuration management system designed to provide automated configuration and maintenance of large-scale computer systems.
BLOKK	-	BLOKK font helps you create good looking mock-ups and wireframes, where layout is more important than latin words.
COBRA Snipping Tool	-	With this app you have the ability to snipe any screenshot in real time.
