UNTERNEHMENSPROFILE

ALFI TECHNOLOGIES: engineering and manufacturing of automated handling lines and automated production solutions. www.alfi-technologies.com Mehr Informationen [hier](#).

ALTER SOLUTIONS ENGINEERING: high-tech consulting/engineering. Areas of activity: energy, aeronautic, industry, digital, life sciences. <http://www.alter-solutions.com> Mehr Informationen [hier](#).

ANNECY TECHNOLOGY: stamping drawing, spring washers, molding and overmoulding of technical parts. www.annecytechnology.com Mehr Informationen [hier](#).

A2IA: software company specialised in the recognition, extraction and classification of complex documents. www.a2ia.com Mehr Informationen [hier](#).

COTHERM: air & water heating controls, thermostats & refrigeration controls. www.cotharm.com Mehr Informationen [hier](#).

DEDIENNE MULTIPLASTURGY GROUP: specialized in the metal substitution for the Automotive and Aerospace Industries and in the manufacturing of composites and high end performance polymers. <http://www.dedienne.com/EN/> Mehr Informationen [hier](#).

JPB SYSTEME: development of ready to use Lockwireless anti-rotational devices for the aeronautic and aerospace industries and applications across the automotive, railways, marine and nuclear industries. <http://www.jpb-systeme.com/> Mehr Informationen [hier](#).

LABORATOIRES PROTECH: French environmental protection group specialised in the protection and the prevention of health and environmental risks. www.protecgroupe.com Mehr Informationen [hier](#).

NOVAE AEROSPACE: development of complex aerostructures; a 80-years industrial heritage in the field of building aircrafts engineering, manufacturing and maintenance in operational conditions of equipment as well as civilian and military aircraft. <http://novae-aerospace.com/en/880-2/> Mehr Informationen [hier](#).

PINETTE EMIDCAU INDUSTRIES: design and supply of forming and testing equipment, automated production lines, custom engineered machines and turnkey plants for the world's largest industrial groups including the aerospace, automotive and energy sectors. <https://pinetteemidecau.eu/en/> Mehr Informationen [hier](#).

SODISTRA: For 45 years Sodistra has designed and manufactured custom made isothermal solutions for air handling and ventilation for the industrial sector. <http://www.sodistra.com/> Mehr Informationen [hier](#).

VENTANA: Conception and implementation of efficient manufacturing processes. The Group consists of 6 companies assigned with complementary synergies (mechanical and foundry). <http://ventana-group.eu/en/> Mehr Informationen [hier](#).

Deutsch-französische B2B-Gespräche Industrie 4.0**13.06.17 - Frankfurt****UNTERNEHMENSPROFILE****ALFI TECHNOLOGIES****Activities:**

Services for industries. Alfi Technologies is specialized in engineering and manufacturing of automated handling lines and automated production solutions. The group has developed a unique expertise in the fields of Intralogistics (logistics and courier services, paper industry, tires industry, aeronautics) and building materials production (heavy clay, insulation, concrete, boards). Alfi Technologies operates in France and abroad in many markets.

Deutsch-französische B2B-Gespräche Industrie 4.0**13.06.17 - Frankfurt****UNTERNEHMENSPROFILE****DEDIENNE MULTIPLASTURGY GROUP****Activities:**

Specialist in metal substitution for the Automotive and Aerospace Industry. Leader in the manufacturing of composites and high end performance polymers. Our expertise ranges from a recognized knowledge of materials (plastics, high performance polymers and composites), to the mastery of various implementation technologies to create parts and sub-assemblies covering a wide spectrum of applications. The scope of the know-how positions the group as one of the reference specialists in France for the substitution of metal by plastic, especially in the context of the problem of weight reduction of parts. Our three business units are located in France and Romania with sales offices in Germany and the UK.

- High precision machining
- Injection and decoration
- Thermoforming and stamping
- Surface treatment and metallization
- Products with electromagnetic compatibility

Beginning 1993, JPB Système has studied, mastered and developed an elite set of ready to use Lockwireless Anti-Rotational Devices. These self-locking devices have been designed and destined for the aeronautic and aerospace industries, and have applications across the automotive, railways, marine and nuclear industries. JPB Système is headquartered in France where the Lockwireless technology has been developed and manufactured to provide our customers with the highest level of innovation and quality. In addition a subsidiary has been developed in United States to better serve our customers and provide a solid base for expanding into new markets.

PINETTE EMIDÉCAU INDUSTRIES

Activities:

Aircraft Industry/Railway Industry. Pinette Emidecau Industries is an industrial engineering group that designs and supplies forming and testing equipment, automated production lines, custom engineered machines and turnkey plants for the world's largest industrial groups including the aerospace, automotive and energy sectors. For more than 150 years, its success has been driven by a technically skilled workforce and a business development strategy based on innovation, cooperation and global services. COMPOSITES FORMING SYSTEMS: Pinette P.E.I. is a leading manufacturer of plastics and composites forming systems - from single presses to automated forming lines - and laboratory equipment. The company has delivered more than 2,500 units in all countries. Designer, manufacturer and supplier of hydraulic presses for SMC, GMT, LFT, RTM from 100 to 40,000 kN and automated thermocompression lines for PEEK, PEI, PPS, epoxy (3D stamping, consolidation, hot forming), Pinette P.E.I. is also able to manage full plant engineering worldwide. TESTING EQUIPMENT: For over 30 years, Pinette P.E.I. has been developing and supplying customized test benches of large dimension. We design and deliver Non Destructive Testing (NDT) test benches using sound technology for the composites industry. On the other hand in the oil and gas industry, Pinette P.E.I. is one of the leading manufacturers of combined load frames for premium connection applications.

UNTERNEHMENSPROFILE

VENTANA

Activities:

Industry. Conception and implementation of efficient manufacturing processes. The Group consists of 6 companies assigned with complementary synergies (mechanical and foundry):

Ventana Arudy: precision sand casting and resolutely committed to innovation, Ventana Arudy is producing large sized complex castings in aluminium and magnesium alloys.

Ventana Toulouse: Since its creation in 1921 in Toulouse, in a region that is heavily focused on the aeronautical and high technology sectors, Ventana Toulouse is specialized in the production of small and medium sized technical parts in sand-cast aluminum alloys.

Ventana Narcastet: A specialist engineering company for parts combining high dimensional and geometrical precision, Ventana Narcastet masters machining from forgings, castings and laminated metal of all alloy types and particularly high resistance and refractory alloys.

Ventana Taverny: An historical player in precision mechanical manufacturing in the Paris region, recognized by its customers for prototype manufacturing, small serial production and precision units with high added value.

Ventana Agenteuil: CIMB is a traditional sheet metalworking company on the aeronautical and nuclear markets that specializes in the transformation of metal sheets (stainless steel, nickel-based, titanium) associated with precision mechanical welding.

Vint'Air: Parts manufacturing for Vintage enthusiasts

International certifications: ISO 9001, EN 9100 & NADCAP
