

# JÉRÉMIE NAULET

## BIOGRAPHY

Jérémie Naulet is an electronic DJ and Producer based in Paris, France. He discovered the Techno movement in the German clubs at the age of 17 and quickly became passionate about DJing.

He worked as a resident DJ in different clubs both in France and Germany and in 2001 enrolled himself at the prestigious “DJ-Network” School in Southern France to perfect his technique and knowledge. A year after graduating he became one of the school's teachers and participated in the opening of a second establishment in Paris as a manager where he worked for 8 years.

During this time he also began composing and signed his first Dubstep productions to French and US labels under the name Sumsquare, later a glitch-hop style band called Skillfulgorilla was born together with a fellow friend and producer. Signed with different labels like **High Intensity Records** and **Heavy Artillery**, Skillfulgorilla reached the **number one spot on The Beatport Glitch-Hop charts in 2014**.

In 2017 Jérémie decided to come back to his roots and create a Techno and House project under his real name, Jérémie Naulet. His unusual career gives him a different approach to DJing and Producing, proving with his work and style that there are other avenues to explore in the world of electronic music.

“It is a musical project between melodic Techno and House, with a goal to create a track with a great groove and melody.” Composing everything himself gives Jérémie the freedom to create a more versatile sound, using different kind of chords, scales and modulations to infuse jazz, soul or classical into the dynamics of Techno and House.
