Have you ever wondered what it's like to breath underwater? The Try SCUBA program allows you to experience the thrill of diving without all the work. Join us on the "Mongoose" snorkel boat to try diving or snorkel the Destin Jetties!

Join ScubaTech and dive the beautiful waters of the Emerald Coast

Unlike anywhere in the Panhandle of Florida, Destin is unique in that the limestone outcroppings begin just a few miles off the beach, & are covered with soft corals, sponges, game fish, and an abundance of tropical fish. These ledges are also home to shovel-nose and spiny lobsters. The reefs range from 2-8 feet in height at a depth of 82-95 feet.

We offer many types of classes on SCUBA diving to include Open Water and Advanced Open Water classes, just to name a few. We usually dive March through late November, with water temperatures ranging from the mid 60's in early spring to the low 80's in the summer.

The observant SCUBA diver will also notice many types of shells and the photographer will be surprised at the magnificent macro photography and underwater scenery. So, don't waste another minute, come get certified with ScubaTech today!

VOTED THE BEST DIVE BOAT ON THE EMERALD COAST!

The "Sea Cobra" is the fastest, most comfortable dive boat in Destin. She is 45 of diving pleasure. The "Sea Cobra" has a spacious deck with bench seats, tank racks, and two easy entry giant stride points. She also has two drop down ladders for easy access getting back on board the vessel.

The "Sea Cobra" has a large cabin for equipment storage and passenger comfort and is equipped with a clean marine toilet. Powered by twin 892 Detroit Diesel Engines, she will get you to the dive sites quickly, allowing divers maximum dive time and maximum FUN!

Our most popular charter is a 4-hour, 2-dive trip to Destin's natural limestone ledges, wrecks and/or artificial reefs. The first dive is generally a natural limestone ledge to depths of approximately 80-90 feet, and about 3-10 miles from the Destin East Pass.

The second dive could be something shallower, such as the "Miss Louise Tugboat", one of several barges, or Destin's Bridge Rubble, with depths in the 55-70 foot range.
